LEARN ABOUT CUSTOM GARAGES

At Conestoga Buildings, we not only strive to make your custom garage a reality with affordable, post frame construction, we challenge you to dream about the many possibilities with a new custom garage. Some people think of a garage as simply a functional space to keep their vehicles out of the weather. Others see a well-designed, custom garage as a space with multiple uses and benefits.

Other than storing your vehicles, you can use your new garage as a workshop, a living space, for household storage, for car care and maintenance, or to store you RV or boat. The possibilities are endless as to what your new garage can bring to your property—and your life!

Interior Finishes

There are various options available to finish the interior of your new garage. Metal wall panels can be installed for a sleek finish that's easy to clean or opt for drywall to create a professional, warm look.

Second Floor

When designing your building, you can choose to have overhead space for storing holiday decorations or recreational equipment or create a custom second floor living space with built-in kitchen.

Carriage Style Doors

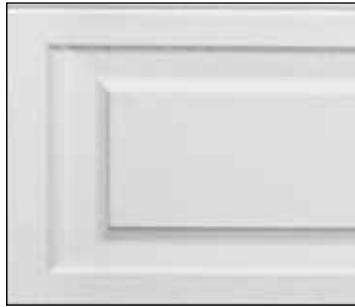

DOOR OPTIONS

Deciding which type of overhead door(s) to choose depends on the look you are trying to achieve with your new garage. Many times, carriage style doors are selected for a country look while traditional doors are simple and versatile. All doors are designed for long-lasting performance and durability and have the option for window inserts.
